# About us

Project Engineering Service is in operation since 1979 & undertakes turn-key contracting works for process and utility areas in F&B segments. It includes Dairy plants, CIP system, Soft Drink Plants, Breweries & Distilleries, Confectionary units, Frozen Food plants, Pharmaceutical plants and is assisted by our design & drawing office with professional & qualified engineers with all modern facilities. There has been exceptional business growth in our operations in last two decades and have gained customer confidence & trust to meet their requirements. We carry from design, manufacture, supply, installation and commissioning of Process and Utility requirements including piping, valves fittings, flow equipments, tanks, silos, Cable Trays for end users. Our already proven 'ASTRA', make is well known brand today in the market for all above items. PES is known for its impeccable quality in our engineering & assures the highest standards of reliability, durability and hygiene for our all operations. After-Market is our another feature to win our customers.
